

# AMO Seminar

*Friday, April 17, 2009  
2:00 pm*

*Physics conference room (Small Hall 123)*

## **Welcher Weg, Quantum Interrogation, and the Quantum Eraser (... *these are a few of my favorite things*)**

**Dr. Jan Chaloupka**  
*The College of William&Mary*

In this informal talk, Prof. Chaloupka will discuss a few aspects of quantum mechanics that are simple to describe, confounding to understand, and a delight for the entire (physics) family. The talk will be appropriate for a broad audience, but a familiarity with some of the general concepts of quantum mechanics might be helpful.
