Read the letter to the editor of “Physics and Society” written by Travis Norsen (posted on Blackboard), in which he suggests that the Copenhagen Interpretation of Quantum Mechanics is sorely lacking.

Compare and contrast that with the attitudes and arguments posed by Daniel Styer, for example the discussions in Section 14.3 and Section 15.2.

Which argument is more persuasive to you, and why?

Length - approximately two pages. Do not worry about citations or bibliography for this.
