Programming with MATLAB for Scientists

A Beginner’s Introduction

Eugeniy E. Mikhailov, College of William and Mary, Department of Physics, Williamsburg, Virginia, USA

This book offers an introduction to the basics of MATLAB programming to scientists and engineers. The author leads with engaging examples to build a working knowledge, specifically geared to those with science and engineering backgrounds. The reader is empowered to model and simulate real systems, as well as present and analyze everyday data sets. In order to achieve those goals, the contents bypass excessive “under the hood” details, and instead gets right down to the essential, practical foundations for successful programming and modeling.
