BECOME AN INTERN AT THE LUNAR AND PLANETARY INSTITUTE!

The Lunar and Planetary Institute (LPI) invites undergraduates with at least 50 semester hours of credit to experience research in the planetary sciences. As a summer intern, you will work one-on-one with a scientist either at the LPI or NASA Johnson Space Center on a research project of current interest in planetary science. The Summer Intern Program allows participants to experience a real research environment, to learn from top-notch lunar and planetary scientists, and to preview careers in science.

The 10-week program runs from June 2 to August 8, 2008. You will receive a \$3500.00 stipend plus housing and a \$1000.00 travel expense reimbursement.

APPLICATION DEADLINE: JANUARY 25, 2008
