As appropriate, please advertise to your students and faculty the following opportunity for individual students or teams of students (undergraduate and graduate) to participate under the guidance of a faculty member.

Thanks,  
Laurie Sanderson

Dear Colleagues,

We are pleased that the FAA has decided to continue the FAA Design Competition for Universities for the 2008 – 2009 academic year! The Competition has added a new challenge area for Airport Management and Planning. We hope you will participate in the Competition and make colleagues and students aware of this as well.

The Competition guidelines and many resources are posted at the Competition website: [http://www.faa.gov/runwaysafety/design\\_competition.htm](http://www.faa.gov/runwaysafety/design_competition.htm)

The broad challenge categories of Airport Operations and Maintenance, Runway Safety/Runway Incursions, Airport Environmental Interactions and Airport Management and Planning embrace many engineering, science, information technology, psychology and management disciplines. The Competition is again open to individual and student teams at U.S. colleges and universities (both undergraduate and graduate) working under the mentorship of a faculty advisor. Winners can earn cash awards and first place winners have the opportunity and travel funds to present their design at the AAAE annual meeting in Philadelphia, PA in June 2009. A notice of intent is strongly encouraged.

An email announcement is attached for your convenience in sharing with individuals you feel would have an interest in the Competition.

Please feel free to contact me or Debbie Ross (dross@odu.edu) if you have any questions.

Mary
