Dear Department Chair,

I am pleased to announce that APS and IBM will again co-sponsor a research internship program for undergraduate women in physics and related fields in the summer of 2009. We ask your assistance in sharing this information with young women students in your departments who may be interested in this excellent opportunity.

The internships are salaried positions typically 10 weeks long, and include in addition a \$2,500 grant, plus the opportunity to work with a mentor at one of three IBM research locations. Applications must be submitted by February 15, 2009 using the web-based format. Please note that letters of recommendation should be emailed directly to IBM. Complete details on the program and how to apply are available at <http://www.aps.org/programs/women/scholarships/index.cfm>. Questions about the program itself should be sent to me at bajones@almaden.ibm.com.

Barbara Jones, Manager
Theoretical and Computational Physics
