Dear Colleague:

The Princeton University Department of Physics invites recent PhD recipients in the international physics community to apply for a Princeton Fellowship in Experimental Physics (PFEP).

The Physics Department aims to recruit and support exceptional recent PhD recipients in experimental physics through a three-year honorific postdoctoral fellowship program. Nominees from all areas of experimental physics will be considered and selected through an annual competition. The selected fellows are expected to work with the existing experimental groups in the department, although those who wish to pursue a specific independent research program will also be considered. Princeton has experimental research programs in Atomic Physics, Biophysics, Condensed Matter Physics, Cosmology & Gravitation, High Energy Physics, and Particle Astrophysics.

This year, the Physics Department will select two fellows. We anticipate reaching a steady state of six fellows. One of the fellows will be selected as a Dicke Fellow, in recognition of Princeton physicist Robert Dicke. In addition to salary and benefits, the program will provide a discretionary fund of \$6,600 per year for each fellow. Candidates who are not selected for a PFEP will be considered for other postdoctoral positions.

We would greatly appreciate your assistance in posting the attached flyer and/or recommending exceptional candidates to apply directly to <https://phy-apps.princeton.edu/Apply1.php>. Candidates will be asked to submit the names and addresses of three individuals who can provide letters of recommendation, a CV, a publication list, and a statement of research interests. To ensure full consideration, all materials must be received by November 3, 2008.

The selected fellows must have received a doctoral degree in physics or related field by September 1, 2009 (prior to the start of their fellowship).

Thank you for your attention and assistance in helping us to recruit outstanding PhDs to this very important program.

Sincerely,

Curtis Callan
Professor and Chair
Department of Physics
Princeton University

Three-Year Postdoctoral Fellowship

Princeton Fellowships in Experimental Physics (PFEP)

The Physics Department aims to recruit and support exceptional recent PhD recipients in experimental physics through a three-year honorific postdoctoral fellowship program. Nominees from all areas of experimental physics will be considered and selected through an annual competition. MORE INFORMATION MAY BE FOUND AT
[HTTPS://PHY-APPS.PRINCETON.EDU/APPLY1.PHP](https://phy-apps.princeton.edu/apply1.php)

TO ENSURE FULL CONSIDERATION,
PLEASE SUBMIT ALL APPLICATION
MATERIALS BY NOVEMBER 3, 2008.

Princeton University is an Equal Opportunity/Affirmative Action employer and particularly welcomes nominations of women and members of underrepresented minority groups. The application will give you the opportunity to self-identify.
