---

For many years, the Department of Energy has funded the SULI program at Jefferson Lab for undergraduate United States citizens and permanent resident aliens to come to Jefferson Lab for 10 weeks during the summer and work directly with a scientist.

Thanks to the Jefferson Sciences Associate's Initiatives Fund, this year Jefferson Lab will also be able to host four undergraduate students who are not United States citizens or permanent residents through the RIFU program. These two programs will be run in parallel.

For more information about these undergraduate programs:

U.S. citizens and permanent residents can go to:

<http://www.scied.science.doe.gov/scied/erulf/about.html>

Non-U.S. citizens can go to:
